[FINALInitialTSRInventory112513.pdf](#)

Here is one other document that might be helpful: our initial inventory of WQS topics, including those for which we requested public comment as part of the Triennial.

Thanks, Cathy

Subject: 2013 Triennial Outcome

Good morning, Tom –

For our meeting tomorrow, I've attached a spreadsheet that shows current WQS rulemaking projects and the priority projects we've selected for the next triennial period.

We will provide an overview of what we heard from the public as well as internal staff, the rationale for our selections, and how we plan to manage this work. That should leave ample time for discussion. If there is anything else you would specifically like to hear about, please let me know.

Looking forward to the discussion. We'll be in Katrina's office waiting for your call: 651-757-2490. Thanks –

Cathy O'Dell

P.S. Another item relating to the triennial is documentation. We don't need to cover this tomorrow unless there is time, but what specifically do you require for this? For example, the public meeting was webcast and recorded; we could have this put on a CD and sent it to you, if you like. A written summary of the public meeting was also prepared and is available on the MPCA's website along with complete copies of all the letters received from the public pertaining to the 2013 Triennial, in PDF format (about 600 pages worth, thanks to plentiful documentation provided by a couple of parties in support of their comments). I assume EPA wants to have this information, but what is the best way/format for this?
